EXPERIENCE

NEPTRONIC
UX | UI Designer (Part-Time)

September 2021 - March 2023

- Design a cloud device management application by proposing a young and fresh design that prioritizes quality of life and usability using visual design tool Figma and prototyping tools in AdobeXD
- Offer a color palette that pairs dark and light themes to couple the modernity with the existing brand identity
- Create a researched and informed design to put forward desired navigation by putting together wireframes and testing with potential customers
- Work alongside a team of developers to comprehensively analyze the coding possibilities, assess feasibility and ensure adherence to time constraints for the design implementation

DEVSTACK
Brand Design Freelance Contract

May 2021

- Collaboratively create unique designs, color palettes, and brand personality to best represent the client's vision for their company identity

SUMMIT-TECH MULTIMEDIA COMMS
VR Application Developer Intern

April 2019 - May 2019

- Optimize and upkeep UI interface changes in VR applications
- Contribute to VR application development in Unity Engine
- Implement essential file management tools using System.IO
- Upgrade legacy Unity Engine code to newer version of Unity standards
- Upkeep old code to optimize overall application performance

NATIONAL BANK
Referrals Senior Attendant Summer Contract

April 2017 - September 2017

- Process loan requests and direct them to the relevant internal database
- Use custom command line queries to search and update existing bank accounts in the database
- Use proprietary software to create or update client accounts and attach received necessary documents for processing
